

Proximity sensor type L.V.D.T.

| Supply voltage | $24 \mathrm{~V} \pm 20 \%$ |
| :--- | ---: |
| Polarity reversal protection | $\operatorname{max~} 300 \mathrm{~V}$ |
| Switching point hysteresis | $\leq 0,06 \mathrm{~mm}$ |
| Reproducibility | $\pm 0,02 \mathrm{~mm}$ |
| Max. output current | $\leq 250 \mathrm{~mA}$ |
| Protection against short circuit | yes |
| Operating temperature | $-25^{\circ} \mathrm{C} \div 85^{\circ} \mathrm{C}$ |
| Connection type | connector |
| Protection according to DIN | IP 65 |
| Max. pressure | 315 bar |

CE certificate according to 89/336/EEC EMC is provided. A screened cable is needed.
The LVDT position transducers allow to check exactly the very instant when the passage of a minimum flow is allowed.

Functional diagram on pin 2 and 4

$\mathbf{0}=$ Voltage $\operatorname{Pin} 2$ and $\operatorname{Pin} 4<1,8 \mathrm{~V}$
1 = Voltage Pin 2 and Pin $424 \mathrm{~V} \pm 20 \%$

Overall dimensions connector

Type of protection Ambient temperature

IP67

Ordering code: V86400003

## Electrical connections LVDT

(A) With this connection, on the Pin 4 an output signal is active when no oil is crossing the valve (from $\mathrm{P} \rightarrow \mathrm{B}$ ).

Switching point

B With this connection, on the Pin 4 there is no output signal when oil is crossing the valve (from $\mathrm{P} \rightarrow \mathrm{B}$ ).

NB:
connecting the output to Pin 4 or Pin 2 the type of contact, normally closed or open, can be chosen.
